

# *Our Story*

## Christine Flanagan and Frances April

*Our family thought the Adult Day Center was a life saver for our mom, but once our mom attended we found it was also a life safer for us! The thought of her attending the center was such a relief knowing she was surrounded by a loving, caring staff for her and a very supportive staff for the family struggling through this awful disease!*

*She was able to participate in so many activities having a purpose in her day! With much gratitude for all you do for so many families!!! Thank you!*
